Subject: RE: NBH Intertidal Phase 2 individual parcel map - example for review

Patty-

Unfortunately Titleist is not the best parcel to use for an example – because our intention there is a bit different. Contamination that extends from the former Aerovox facility onto the Titleist property has been acknowledged by AVX as part of their 21E cleanup areas and AVX designated that as OU1 in the recent Phase III. Because the MHW line is referenced in the definition of Site boundary in enforcement documents, that may be important to include in the figure that we transmit to Titleist as we will also be communicating this data to AVX and MassDEP and pushing for the contamination (at least above MHW) to be addressed by AVX as part of OU1. Elaine Stanley is the lead on the Titleist intertidal data transmittal, because Elaine is the lead on the Aerovox 21E oversight. I believe that Elaine may already have used the Figure you prepared before to transmit the data to Titleist. I guess for the purpose of considering what's presented and how its presented on the figure, considering the example you sent is fine, but I just wanted to note that Elaine is already working on the Titleist transmittal. Thanks.

Subject: NBH Intertidal Phase 2 individual parcel map - example for review

Hi Dave,

Attached is an individual parcel map for Parcel 112-133 (Titleist) showing the sampling results, the +3.1 foot elevation contour (hypothesized extent of PCB contamination attributable to tidal influence), and the 25-foot corridor targeted for the Riverwalk easement as shown on the April 2016 version of the Riverwalk site plans (the CAD files that we received on Friday). We removed the MLLW and MHHW tide lines to reduce visual noise.

Please let me know if you would like us to make any changes to the content/format of this map, and then we will generate the individual maps for the rest of the Phase 2 parcels. We have also prepared an individual data table (with all historical and 2015 results for all depths) for each parcel that we will submit with the maps.

Patty
